EXPERIENCE

Quality Assurance Engineer

Trailique Infotech 2024 - Hinjewadi

I have successfully completed my internship at Trailique Infotech. I have experience working as a manual tester on a marketplace project as well as two live projects. I am skilled in writing clear and semantic test cases, creating bug reports and testing whole websites, mobile apps and responsive web apps. I also have experience testing the designs of various projects.

PROJECTS

A. Project Name – Student Attendance Tracker

a. Platform and Language - The system is developed using the Model-View-Controller (MVC) Structure, Which provides a clear separation of concerns between the application's data (Model), user interface (view), and control flow (controller). The system Consists of a front-end developed using HTML and CSS, a back-end developed using Java language, and a MySQL database table. The server Used is Tomcat Apache version 9.0.

b. Part of the project specifically Developed-

1. Login And Registration Page
2. Add students Details like Roll.no., Name, attended class and Total classes
3. And another one is Get student Details. In which we get All students Information.
